The accompanying notes are an integral part of these condensed interim financial statements.

1. NATURE OF OPERATIONS

Grosvenor Resource Corporation (the “Company”) was incorporated on January 6, 2004 under the laws of the Province of Ontario and was granted certification of continuation by the Province of British Columbia and is considered to be in the exploration stage with respect to its evaluation and exploration asset. Based on the information available to date, the Company has not yet determined whether its exploration and evaluation asset contains ore reserves. Recoverability of the carrying amount of the exploration and evaluation asset is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

The Company’s head office and principal address is 202-2168 Marine Drive, West Vancouver, British Columbia, Canada, V7V 1K3. The Company’s registered and records office is 1500 – 1055 West Georgia Street, Vancouver, British Columbia, Canada, V6E 4N7.

The recovery of the amounts comprising exploration and evaluation assets is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development, and upon future profitable production.

These unaudited condensed interim financial statements have been prepared on the basis of accounting principles applicable to a going concern which assumes that the Company will be able to continue in operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. To date, the Company has financed its operations through issuance of common shares and the receipt of dividend income. The Company currently has cash and equivalents, marketable securities and short term investments totalling \$1,966,367 and net working capital of \$2,008,492 which, management believes, is sufficient to fund its current operations in the foreseeable future. In the longer term, additional equity or debt financing may be necessary to fund exploration and general and administrative activities.

These unaudited condensed interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

2. STATEMENT OF COMPLIANCE

These unaudited condensed interim financial statements were authorized for issue on July 24, 2024 by the directors of the Company.

9. SEGMENTED INFORMATION

The Company operates in the acquisition and exploration of resource assets segment. The Company's exploration and evaluation asset is held in Canada.

10. FAIR VALUES

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The carrying value of cash and equivalents, receivables and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments. The fair value of short term investments and marketable securities was \$628,033 (August 31, 2023 - \$607,091) and \$842,580 (August 31, 2023 - \$1,435,140) respectively, as at May 31, 2024, which are level 1 fair value measurements.

11. FINANCIAL AND CAPITAL RISK MANAGEMENT

Financial risk factors

The Company's Board of Directors has the overall responsibility for the establishment and oversight of the Company's risk management framework.

The Company is exposed in varying degrees to a variety of financial instrument related risks and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk of financial loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and equivalents, short-term investments and receivables, the carrying value totalling \$1,174,879, represents the Company's maximum exposure to credit risk. Management believes that the credit risk concentration with respect to financial instruments is remote because cash and equivalents and short-term investments are held with reputable Canadian financial institutions. Receivables consist mainly of dividends, GST and interest. The Company does not consider any of its current receivables past due. The Company believes any credit risk associated with its receivables is low due to the historical success of collecting receivables.

11. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd)

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when they come due. As at May 31, 2024, the Company had a cash and equivalents balance of \$495,754, marketable securities of \$842,580 and short-term investments of \$628,033 to settle current liabilities of \$11,170. All of the Company's financial liabilities are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and equity prices. These fluctuations may be significant.

a) Interest rate risk

The Company has cash and equivalents balances and short-term investments. The Company's current policy is to invest excess cash in investment-grade short-term deposits certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. The effect on net loss of a 1% change in interest rates is approximately \$4,600.

b) Price risk

The Company is exposed to equity risk with respect to the market price of its Newport shares. A change in market price will impact the value of its Newport shareholdings and have an impact on other comprehensive loss and working capital. The effect on net loss of a 1% change in market price is approximately \$6,200.

Capital management

Grosvenor's objectives when managing capital is to pursue the exploration and evaluation of its mineral property, possibly acquire additional mineral property interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes the components of shareholders' equity.

Grosvenor manages the capital structure and makes adjustments to it, in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company monitors its expenditures against its available capital.

The Company is currently not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.
